

Brightcove Plug-ins

Here are some representative samples of the values we add to the plug-in enum field of a given Brightcove player:

Rendition Quality selector plug-in (note, this is a third-party open-source plug-in using default query values. More info here: <http://opensource.brightcove.com/project/Rendition-Selector-Plugin>)

- <http://bc3.sptidigital.com/brightcove/plugins/RenditionSelector.swf?choices=LOW,200-400IMED,700-900IHIGH,1000-1300IHD,1600-2000IAUTO,-1&default=MED&spinner=true&spinnerbg=false>

Brightcove Google Analytics plug-in (hosted on our Akamai Netstorage account)

- <http://bc3.sptidigital.com/analytics/GoogleAnalytics.swf?gid=UA-10683030-2> (where the "UA-number" = the required Google Analytics tag)

SDI / Plymedia subtitle plug-in (One TV Asia)

<http://static.plymedia.com/players/default/bcsubplyplugin.swf?skin=sony&skinLanguageId=sony&videoPlayerId=videoPlayer&fetchSkinStyle=true>

SDI / Plymedia subtitle plug-in used for CCC (note the defaultSubLang=spe in this case will default EU Spanish subtitles to on)

<http://static.plymedia.com/players/default/bcsubplyplugin.swf?skin=sony&skinLanguageId=sony&videoPlayerId=videoPlayer&fetchSkinStyle=true&defaultSubLang=spe>

If your players are built from custom templates, we could modify the BEML to include the appropriate plugins for all players created from the template automatically
